

Job Title	Lead Full Stack Engineer
Type	Full-time
Job Location	Nashville, TN
Posted On:	09/23/2024

About Giggs:

Giggs is the LinkedIn of the live event industry - a dynamic platform that transforms how professionals and employers connect in a word-of-mouth market. By streamlining the hiring and job discovery process, Giggs provides a secure, efficient space where vetted professionals meet top employers. Focused on building trust and enhancing industry relationships, Giggs offers value-added services like background checks and contact management tools, eliminating inefficiencies and revolutionizing networking within the live event space.

Job Function:

Software Engineering

Job Summary:

Giggs is a fast-growing startup revolutionizing the live event and music touring industry, and we're looking for a **Lead Fullstack Engineer** to join our team and help shape the future of our platform. If you're passionate about building scalable, high-performance applications and want to play a key role in a startup's growth journey, this could be the opportunity for you!

Job Description:

Key Responsibilities:

- Lead the development of our platform and define technical direction and architecture.
- Build, maintain, and scale our applications using Fullstack
 - **Typescript, NextJS, tRPC, Prisma, PSQl, NestJS, and Chakra UI.**
- Manage and optimize a monorepo setup with **pnpm** and **turborepo**, ensuring efficient codebase management and CI/CD pipelines.
- Collaborate with cross-functional teams, including designers, product managers, and other engineers, to develop new features and improve existing ones.
- Play a critical role in the growth of the engineering team, with the opportunity to build, mentor, and lead a team of engineers as we scale.
- Manage deployments and services across **Render.com** and **Vercel**
- Work closely with the executive team to help define product direction and strategy.
- Contribute to the overall direction of the product, including working on the backend architecture, frontend UX/UI, and DevOps setup.

Requirements / Qualifications:

Requirements:

- **Proficient** in **Typescript, NextJS, tRPC, Prisma, PostgreSQL, NestJS, and Chakra UI.**
- Experience working within a **monorepo** setup, using **pnpm** and **turborepo** for dependency management and task running.
- Strong understanding of building and deploying scalable applications on **Render.com** and **Vercel.**
- Experience with **PostgreSQL** and understanding of database schema design, migrations, and performance optimization.
- **5+ years of experience** in software engineering with a track record of delivering high-quality, maintainable code.
- Extensive experience with **automated testing frameworks** (e.g., Jest, Cypress) and implementing robust CI/CD pipelines using tools like GitHub Actions, GitLab CI, or Jenkins.
- Previous experience working in a startup environment is a plus.
- **Nashville-based** or willing to relocate, as this is a primarily **in-person role.**
- Leadership experience or strong desire to grow into a leadership role with the potential to lead a team of engineers.

Why Join Us?

- Be part of a **high-growth startup** that is disrupting the live events and music touring industry.
- Opportunity to grow within the company and take on a **leadership role** as our team expands.
- Work in a supportive environment that values innovation, collaboration, and work-life balance.

Compensation (Salary or Hourly Rate)

Salary - Negotiable based on experience

Benefits:

Will discuss.
