

Summer Internship Opportunity at Xuron Inc.

Game Development Intern for Medical Education Training

Xuron Inc. is seeking a motivated and creative Game Development Intern to join our innovative team for Summer 2025. This exciting opportunity allows you to contribute to cutting-edge medical education training scenarios while gaining valuable industry experience at a fast-growing startup.

Position Start Date: Immediate

Duration: 3+ months (with potential for extension)

Compensation: \$35/hour @ ~15/hr per week (approximately \$1,500-\$2,000 monthly depending on hours)

About Xuron Inc.

Xuron is a Nashville founded VC-backed startup. We specialize in developing immersive medical education training scenarios that revolutionize how healthcare professionals learn and practice. Our interactive simulations provide realistic environments for medical training, improving patient outcomes through better-prepared healthcare providers. As a growing startup, we offer a dynamic work environment where your contributions will have direct impact on real customers.

Role Description

As our Game Development Intern, you will work closely with both our technical and medical teams to build, create, and deploy new courses for our customers. You'll gain hands-on experience in developing interactive medical training scenarios that will be used by healthcare professionals.

Key Responsibilities:

- Develop and implement new medical education training scenarios using Unity game engine
- Work with Character Creator to design realistic characters for simulations
- Collaborate with medical experts to ensure training accuracy and relevance
- Test and optimize training modules for optimal user experience
- Contribute to the continuous improvement of our educational platform

Requirements:

- Experience with Unity game engine (required)
- Game design or development background
- Self-motivated with ability to work autonomously
- Strong problem-solving skills and attention to detail
- Interest in medical education and training technology

Ideal Candidate:

We're looking for a "go-getter" who can work independently while collaborating effectively with our team. The ideal candidate will be passionate about game development and interested in applying these skills to educational contexts. While computer science technical experience is valuable, it's not strictly required—we value creativity and willingness to learn.

Growth Opportunity:

This position offers potential for growth within our company as we continue to expand. Successful interns may be considered for permanent positions based on performance and company needs.

Eligibility:

This opportunity is open to both college students and professionals from the public. To apply, please submit your resume, portfolio (if available), and a brief statement explaining your interest in medical education technology.

Join Xuron and help us transform medical education through innovative game development!
